FRAUD COMBAT CONTROLS FOR BANKS

ATM, BRANCH & CORPORATE BANKING (HNI) PROTECTION

Environ secures high-risk banking channels using behavioural intelligence and Proof-of-Life authentication, with particular focus on ATM, branch, and Corporate Banking (HNI) environments.

ATM & Branch Controls

- Proof-of-Life customer authentication
- Elimination of stolen credential fraud
- Secure teller and override authorisation.

Corporate Banking (HNI) Protection

- Biometric digital signatures for high-value transactions
- Dual-control approval with Proof-of-Life
- Insider risk reduction for relationship-managed accounts
- Board-level accountability for privileged actions

CBN & Audit Readiness

Each high-risk action across ATM, branch, and Corporate Banking (HNI) is cryptographically and biometrically bound to a living individual, producing regulator-ready audit trails.
